DESTINATION AERODROME	:	Juba
TYPE OF FLIGHT	:	Charter
NUMBER OF PERSONS ON BOARD	:	Five
INJURIES	:	None
NATURE OF DAMAGE	:	Substantial
CATEGORY OF OCCURRENCE	:	Accident

PICTURE: 5Y-JLL after the occurrence

## **REMARKS**

On 3 June 2016, a Cessna 208B of registration 5Y-JLL and serial number 2158 was conducting a charter passenger flight from Akobo Airstrip to Juba with 4 passengers and one flight crew member on board.

According to the operator, during takeoff from Akobo Airstrip at approximately 10 a.m. Local Time, the pilot executed a premature takeoff due to animal incursion on the runway. The airplane's right main landing gear clipped the Airstrip perimeter fence and the aircraft crash-landed onto grass-thatched houses and trees near the end of the runway.

Damage was substantial with no reported injuries. The runway was reported to have been wet at the time of occurrence.

The investigation is being conducted by South Sudan with assistance from Kenya.
